

To obtain things we have to think about them and ask. It's the Law of the Demand and Offer. The more specific you are the more specific will be the answer. We ask you all to spread the most possible this Demand and to repeat it every day at any hour. The more we are the more power we give to our thoughts the quicker they will materialize.

## **TO CHANGE SOCIETY LET'S EXERCISE THE POWER OF DEMAND**

**We demand competent, honest, sincere, coherent and transparent men and women, not in word only but in action.**

**We demand men and women who reject violence, arrogance, aggressiveness, defamation, who seek the common good and who place themselves at the service of the Country; men and women who are free from personal, material, ideological or factional attachments.**

**We demand a brisk and efficient administration, comprised of serious and responsible men and women, who are polite, who are examples of peace, and who feel honoured to serve the whole.**

**We demand men and women who ground their lives on Ethics and Morality, who build a culture on some fundamental values of human society: justice, unity in diversity, co-operation, loving understanding, tolerance, mutual respect, harmlessness in thought and word, joy in serving humanity.**

**We demand an education which will enable every individual and society as a whole to express Love, Beauty and Harmony, in order to make of every life a Work of Art.**
